**Mr. Ray J. Owens
River Commissioner
280 North 100 East
Joseph, UT 84739**

Dear Ray:

RE: Annual assessment

Based on a decision of the Board of Directors I am making a written request that the classification for West Panguitch I & R Company be changed from class one to class two and that the sub class be changed accordingly. Also that this revised classification be applied for last year as well as the one coming up. It is evident that our rights have not, nor will they in the future, require "regular visits by the commissioners".

The Board has agreed that once the revised classification is applied for last year and the assessment adjusted accordingly they will authorize payment of last years assessment and the one for this year.

Now that you have a measuring devise below the dam we cannot see where researching the records to come up with an average annual water delivery would be of that much benefit compared to the time and effort that would be involved. The assessment to West Panguitch only started three years ago.

Please let me know if you have any questions.

Sincerely,

**Claude Hatch
President**

Ray J. Owens
Sevier River Commissioner
